

17.14 DEFERRED ZONE RULES*Refer to Policy sets 5.1, 6.1, 6.3.***17.14.1 Scope of Section**

This section deals with the procedure for removal of deferrals of future urban or rural residential zones on rural, residential or rural residential zoned land in the Deferred Residential, Deferred Mixed Business, Deferred Light Industrial, Deferred Rural Residential, Deferred Tourist Services, Deferred Heavy Industrial and Deferred Papakainga zones.

C10-10/07
Op 3/14
C51-1/15
Op 9/16

This section also provides the ability to remove the indicative road, reserve or walkway symbology from the planning maps once land for the purpose of those items has been vested in Council, or the land has been otherwise acquired by Council for these purposes.

C73
Op 6/23

In conjunction with the removal of a zone's deferral, this section enables the removal of the associated deferral of the Fire Ban or Fire Sensitive Area status that may apply to some location.

This section outlines the planning provisions that apply to areas mapped as deferred zones, and which are subject to the Deferred Zone Framework.

C79 11/24

Deferred zones are identified in the planning maps and feature the word “deferred” in the title. For example, “Rural 1 deferred Light Industrial Zone”. Deferred zones are used to enable the efficient and streamlined transition of undeveloped land with insufficient servicing to developable land. Deferred zones are used when the infrastructure requirements are able to be clearly defined and planned to be delivered within 10 years.

For the purposes of this section the “original zone” is the zone that applied to the land before the land was rezoned to a deferred zone. The “end use” is the provision framework that applies to the anticipated future use of the land, once a specific requirement is satisfied. In the above example, the original zone is Rural 1 and the end use zone is Light Industrial.

17.14.2 Procedure for Removal of Deferral All Deferred Zones

(a) Any area of land listed in Schedule 17.14A and shown on the planning maps that is zoned Rural 1, Rural 2, Rural Residential, or Residential and with a notation of Deferred Residential, Deferred Mixed Business, Deferred Light Industrial, Deferred Rural Residential, Deferred Tourist Services, Deferred Heavy Industrial, or Deferred Papakainga zone, becomes effective as the zone that is deferred, from the date that Council resolves that:

C51-1/15
Op 9/16
C79 11/24

- (i) the relevant service being a reticulated water supply, wastewater, stormwater, or transportation service, as applicable, has been provided, or can be provided to the satisfaction of the Council, either for the whole or for any part of each area of land, including any part that is sought to be developed, to service the land; or
- (ii) where applicable, the date until which the area remains deferred is now due.

(b) Where the relevant service is to be provided by any person other than the Council, concept engineering plans for the service must be approved by the Council before the Council resolves that the deferral for the relevant zone may be removed so that the zone that was deferred becomes effective over that land that is the subject of the service provision.

(c) The removal of the deferred status and the commencement of the new effective zone as listed in Schedule 17.14A is effected by a resolution of Council when the required services have been provided, or can be provided, to the satisfaction of the Council and the Plan is amended without further formality from that date of resolution, to show the new effective zone. Council will advise landowners when it has made a resolution.

C22-2/11 Op 1/15
C10-10/07 Op 3/14
C51-1/15 Op 9/16

~~(d) When a resolution of Council is made for the removal of the deferred status of an area's zoning, this will also apply to the removal of the deferred status of the applicable Fire Ban of Fire Sensitive Area where either exist.~~ C73
Op 6/23

~~(e) Indicative road, reserve or walkway symbology shall be removed once land has been vested with Council for the purpose of the intended road, reserve, or walkway, or the land has been otherwise acquired by Council for these purposes.~~ C73
Op 6/23

Note deleted as part of Plan Change 73.

C10 10/07 Op 3/14
C51 1/15 Op 9/16
C73
Op 6/23

17.14.2.1 Deferred land not listed in Schedule 17.14A

C79 11/24

For any site that is not listed in Schedule 17.14A, the plan provisions that applied to the original zone continue to apply regardless of provision 17.14.2.2.

17.14.2.2 Deferred land listed in Schedule 17.14A

- (a) Any activity, including subdivision, land use, structure or building, that is occurring or is proposed to occur on land that is subject to a deferred zone listed in Schedule 17.14A is subject to the provisions specified in the relevant row of Column C of Schedule 17.14A.
- (b) If the infrastructure required (as stated in Schedule 17.14A, Column D) is delivered then the provisions specified in the relevant row of Column G of Schedule 17.14A apply. For the purpose of this rule, 'delivered' means: infrastructure is either physically constructed, or is planned and funded to be constructed within the next three years, to the satisfaction of the Council's Group Manager – Community Infrastructure and confirmation that the infrastructure has been delivered must also be posted on the Council's website.
- (c) In the event that 10 years elapses from the operative date of the plan change that originally established the deferred zone to the delivery of the necessary infrastructure, then provision 17.14.2.2.(b) must not be applied and the provisions in Column C of Schedule 17.14A will continue to apply thereafter.

17.14.20 Principal Reasons for Rules

~~These zones are temporary, transitional zones on land which the Council wishes to retain for future urban, more intensive activities, either when more appropriate levels of servicing are available or after a time period to maintain a coherent urban form.~~ C22 2/11 Op 1/15
C51 1/15 Op 9/16
C79 11/24

~~The rules enable either the Council or any person to provide the required services and any person may propose to service any part or all of any deferred zone area. In either case, the Council has to approve the servicing proposal, before the deferred status over the relevant part of the future zone can be removed by a resolution of Council. Services may be provided either before or after removal of any deferral.~~ C51 1/15
Op 9/16
C79 11/24

Deferred zones rely on a framework that engages planning provisions in multiple chapters in the Plan, but operate so that certain of those provisions are only triggered after a specific activity has been delivered. Each deferred zone is a separate zone which, through the mechanism set out in this Section 17.14, incorporates the planning provisions of two other zones (the original zone and the end use zone). The application of the provisions changes from the former to the latter depending on a trigger: the delivery of the necessary infrastructure that is specified in Schedule 17.14A. Confirmation of the activation of that trigger for any given parcel of land is provided on the Council's website. C79 11/24

Comprehensive planning, including a full Schedule 1 (RMA) assessment and plan change process is undertaken, including an assessment of the necessary infrastructure, to rezone undeveloped land to a deferred zone. Once the land has been confirmed as a deferred zone, work can begin either by the Council or any other person on delivering the infrastructure to enable development to commence. Once infrastructure has been delivered (meaning it is either physically constructed or planned and funded within the first three years of the Council’s Long Term Plan) then a mechanism is provided in Section 17.14.2 whereby the land can be developed in accordance with the provisions that apply to the anticipated end use. For the avoidance of doubt, at this time the zone will not change but a different set of planning provisions (urban or rural residential provisions) will apply.

A 10-year expiry period applies to deferred zone locations (provision 17.14.2.2(c)). If servicing is not delivered within 10 years, then the trigger becomes unavailable and the original zone provisions will continue to apply thereafter. This ‘sunset clause’ approach is needed in order to require a further assessment of the appropriateness of the end use of the land as circumstances may have changed (for example, sea level rise).

Some deferred zone locations shown on the planning maps (located in Motueka and Māpua) are not included in Schedule 17.14A because they require further assessment for zoning and servicing. No trigger provision is available for these sites as a further plan change will be necessary prior to servicing or development.

In the Richmond West Development Area, integrated servicing and economic or business development efficiencies are intended to be achieved through the method of zone deferrals deferred zone method for specific servicing and, for some land, until serviced land with the same zoning, in a defined area shown on the planning maps and identified in the rules, is substantially taken up. This will result in a sequence of supply of serviced land in the Richmond West Development Area over the long term.

C10 10/07
Op 3/14
C51 1/15
Op 9/16
C79 11/24

Note: The areas notated on the planning maps are deferred for servicing and, for some land, substantial take-up, as shown in the table below.

A, C & F	<ul style="list-style-type: none"> Upgrade the stormwater network.
G	<ul style="list-style-type: none"> Construction of the Lower Queen Street water treatment plant. Upgrade of the stormwater network. Extension of and connection to Council’s bulk waste and water supply networks.
B & D	<ul style="list-style-type: none"> Construction of the Lower Queen Street water treatment plant. Construction of the Borek Creek and Poutama Drain bulk stormwater network. Extension of and connection to Council’s bulk waste, water supply and stormwater networks.
H	<ul style="list-style-type: none"> Construction of the Lower Queen Street water treatment plant. Construction of the Borek Creek bulk stormwater network. Extension of and connection to Council’s bulk waste, water supply and stormwater networks.
E	<ul style="list-style-type: none"> Construction of the Borek Creek bulk stormwater network. Construction of the bulk water supply network from the Richmond South High Level Reservoir to the Richmond West Development Area. Extension of and connection to Council’s bulk waste, water supply and stormwater networks. Substantial take up of serviced land in the Richmond West Development Area with the same zoning.
I	<ul style="list-style-type: none"> Construction of the bulk water supply network from the Richmond South High Level Reservoir to the Richmond West Development Area. Extension of and connection to Council’s bulk waste, water supply and stormwater networks. Substantial take up of serviced land in Area H.

<u>B</u>	<p><u>Construction of the Borck Creek and Poutama Drain bulk stormwater network.</u> <u>Extension of and connection to Council’s bulk waste, water supply and stormwater networks.</u></p>
<u>E</u>	<p><u>Construction of the Borck Creek bulk stormwater network.</u> <u>Construction of the bulk water supply network from the Richmond South High Level Reservoir to the Richmond West Development Area.</u> <u>Extension of and connection to Council’s bulk waste, water supply and stormwater networks.</u></p> <p><u>Transportation: Provision for a single mid-block intersection with SH60 to be approved by NZTA, as part of the central access roadway through mixed business area as per indicative road layout on planning map.</u></p>

Borck Creek construction will progress from the intersection of Lower Queen Street and McShane Road toward State Highway 60, Poutama Drain construction will progress from Borck Creek toward State Highway 6.

~~Development proposals will be considered by the Council before deferrals are removed, if services compatible with the Council’s long term servicing needs as set out in the Council’s Long Term Plan are provided by Council or to the satisfaction of Council.~~

~~C51-1/15
Op-9/16
C79 11/24~~

~~Indicative roads, reserves and walkways are able to be removed from the planning maps once the land for these purposes is vested with Council as part of the subdivision and development process, or the land has been otherwise acquired by Council for these purposes. This ensures redundant items on the planning maps can be simply removed.~~
