

WAIMEA PLAINS FRESHWATER AND LAND ADVISORY GROUP

Agenda Meeting 7

13th February 2015 – 9.30am – 3.30pm

Council Chambers

Objectives:-

- To confirm the management objectives and key attributes for each of the values identified.
- To understand the attribute states for each of the attributes and look at desired state for each attribute.
- Review the benchmarking work being undertaken by Hort NZ and consider next steps

Pre-Work

- Review the values and management objectives. This is collated in the attached power point.
- Think about what attributes will be most useful in measuring whether management objectives are being met. We have reduced previous lists to a smaller subset of key attributes and these are provided in the attached spreadsheet for your confirmation.
- Think about how land uses may change in the future – including if water is limiting and also if it is not. Also consider what might change in the Wai-iti catchment. We will have catchment maps with soils information to work from at the meeting.

AGENDA

9.30am Session One –

- Issues arising since last meeting All
- FLAG membership All

9.50am Session Two –

- Confirm Management Objectives Lisa

10.45am Tea/coffee break

11.00am Session Three -
