Motuela Community Board Meeting 20.07.21.
From: Ian Williamson

To Mr Chairman & Menban of the Community Board.

- As a community I have noticed the residents of Motueka being always prepared to help their reighbours. This is a very commendable feature. I am thinking of Westport and the training of the flooding and wondering what we as a community could do to lessen the impact of flooding in our own town?

  Could the Tasman DC issue in our Newsline" publication some practical suggestions to help?
- 2 A nowbest of out community has asked me if the Taman DC is minded to provide a mains water supply to the new "Tiro Kina Jubd" of Harleysld next Taman?
- It is exciting to see the progress with out rew Mothers Library. Mention has been made of a provision or a hibrary Community Room capable of hobbing 60 persons I am interested to Know it this will be a new facility for this Community Board to use and encourage more attendess from the Mothers Community.
- Doviously with the advent of "Global Warning" and the likelihood of see level rises and flooding it is becoming apparent that higher land blocks of areas wit suitable for harticulture of farming butvery suitable for howing will become developed. Havin I ask what he some developed. Havin I ask what he some developed is hinded to provide a rains water supply a long "Old Coach Road"?
- 3 Monitor progress with the Dog Park with Lynn.)

Thankyon M& Chairman.

#### Golden Elm trees and their removal.

#### Questions

1/Was the TDC consulted regarding the NZTA safety upgrades? If so what contributions or input was supplied to NZTA? Was the community properly consulted? Was the High st tree issue brought to the community for consultation?

2/Does the land of High st belong to the TDC?

3/ Have the plans for High st safety upgrade changed or modified? If so have we the public been notified?

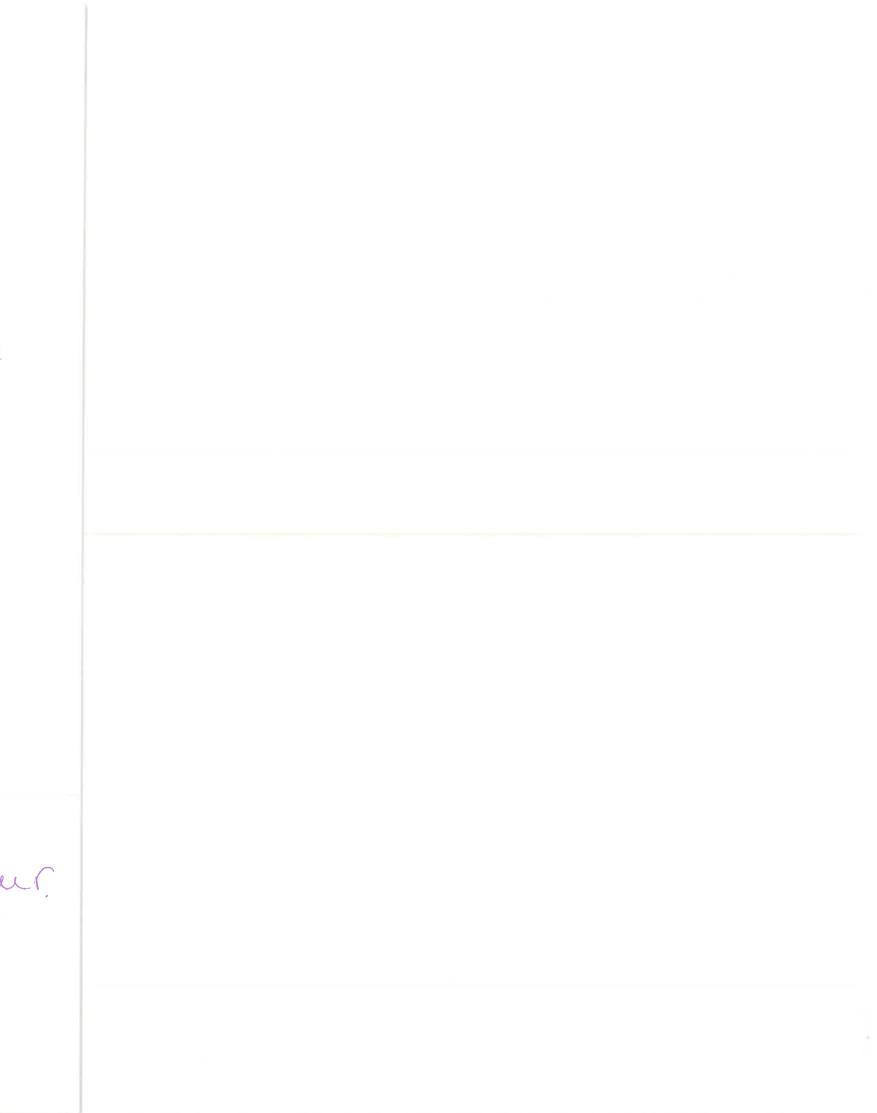

4/ if there are changes does the TDC know what they are?

5/ Is the TDC obliged to reply to any questions brought to to the board formerly and publicly?

6/ A submission regarding the Trees was brought to the meeting last time and tabled as letter about the trees with no idea of its content .

Is this the councils process?

Recently the NZ Transport Agency have stated that in July they will be putting traffic lights on High street. In this process they plan to cut down the majority (12 to be exact ) of **golden elm trees** that have been thriving on High street for over **30** years.

These trees have been providing shade, absorbing fumes and giving our town a unique and vibrant feeling. Without them Motueka would become dull and High St will be barren, while more toxic fumes fill the air.

Recently the NZ Transport Agency have stated that in July they will be putting traffic lights on High street. In this process they plan to cut down the majority (12 to be exact ) of **golden elm trees** that have been thriving on High street for over **30 years**.

These trees have been providing shade, absorbing fumes and giving our town a unique and vibrant feeling. Without them Motueka would become dull and High St will be barren, while more toxic fumes fill the air.

Recently the NZ Transport Agency have stated that in July they will be putting traffic lights on High street. In this process they plan to cut down the majority (12 to be exact) of golden elm trees that have been thriving on High street for over 30 years.

These trees have been providing shade, absorbing furnes and giving our town a unique and vibrant feeling. Without them Motueka would become dull and High St will be barren, while more toxic furnes fill the air.

Recently the NZ Transport Agency have stated that in July they will be putting traffic lights on High street. In this process they plan to cut down the majority (12 to be exact ) of **golden elm trees** that have been thriving on High street for over **30** years.

These trees have been providing shade, absorbing fumes and giving our town a unique and vibrant feeling. Without them Motueka would become dull and High St will be barren, while more toxic fumes fill the air.

Recently the NZ Transport Agency have stated that in July they will be putting traffic lights on High street. In this process they plan to cut down the majority (12 to be exact) of **golden elm trees** that have been thriving on High street for over **30** years.

These trees have been providing shade, absorbing fumes and giving our town a unique and vibrant feeling. Without them Motueka would become dull and High St will be barren, while more toxic fumes fill the air.

#### Presentation to the Motueka Community Board Meeting of July 20th 2021 by Ali Morton

I talked to this group in April and am here again 3 months later because this issue is very important to me and I don't feel it was accurately represented last time. I believe that most of the people who will be affected by the proposed NZTA safety measures on High St are not aware of them. Several people have raised this issue with members of the public and report that most people they talk to are unaware.

In April this year, NZTA Waka Kotahi asked the public for feedback on their proposed safety upgrades. Many people got involved when they heard that part of this involved cutting down all the trees along and close to High St. I heard that submissions were closing 3 days before the deadline and walked along High St talking to pedestrians, letting them know about the proposal and the deadline. No-one I talked to knew about either. NZTA had a site where you could leave comments and they also had an email address you could write to with submissions. This round of feedback has not been summarised or published. I called NZTA and they have no record of a summary of findings. They do have one online from the same process in 2017, where the trees were barely mentioned. Almost all the comments on the social pinpoint site advocate for keeping the trees. I would like to call for NZTA to be accountable to the public and to TDC regarding this round of public feedback. I ask that TDC and Motueka community board represent the people of Motueka fairly by demanding transparency around this submission process. How do we warm has was not here are some questions I have for the board:

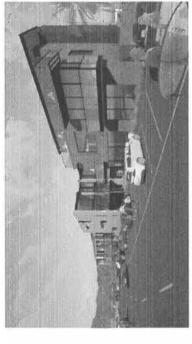

- If work is due to start this month, why haven't the public been informed about it? There is nothing about it in the Newsline mailout or online.
- Have alternatives been considered? E.g. put in temporary traffic lights before spending huge amounts of money, to trial whether they would work or whether they would back up traffic and Motueka would feel even more like a traffic corridor. Eg. pruning the large trees to improve on visibility, Eg. making the crossings much more visible Eg planting more trees to make a green corridor of shade Eg moving one pedestrian crossing away from the trees?
- Why do all the trees need to come down? Why not only some?
- If safety is the issue re visibility, could the crossings be on a raised speed bump or other measures taken?
- I call for a public process that is clear & accessible to ALL residents and evidence that
  alternatives are being considered, not only by NZTA. Until the public are very well-informed
  about the proposals and the options, millions of dollars should not be spent on processes
  that are irreversible.

Many thanks for listening. I appreciate being to participate in our democratic processes and look forward to your reply.

All Morton jugglingali@ginail.com

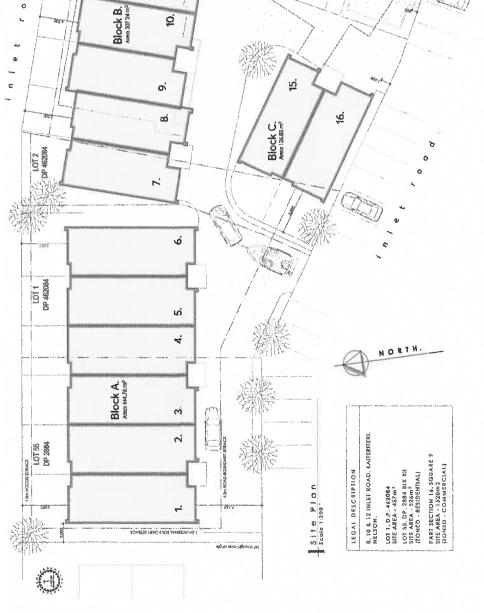

I would like this documented as supporting keeping as many trees as possible on High St.
