Submission ID	First	Last	Should TDC accept liability for most of cost over-runs?	Should TDC guarantee the CIL \$29 million to load to WIL?	Should TDC commit \$14 million to the dam on the basis of community benefits?	Is the dam the best use of the Freshwater Improvement fund (FIF) grant of \$7 million?	Will a dam improve Waimea Plains water quality?	Should TDC commercial surpluses/ profits be diverted to fund the dam?	Is the dam the best option?	Do you have confidence in the way TDC has managed the process?	Do you wish to speak to your submission at the hearing?	
17530	Mary	Sutherland	No	No		Payable by those who benefit by it	No	Yes	No	No	No	
17622	Peter	Talley	Yes	Yes	Yes		Yes	Yes	Yes	Yes	No	
17661	M	Tardine	No	No	No		No	No	No	No	No	
17405	Rowland h	Taylor	No	No	No		No	Yes	No	No	No	The main effect on volume of river flow is pumping from wells by irrigators (WEIC) and Nelson CC (at Roding). These are the only "river extraction" users. All other water usage (including TDC urban) is by pumpage from aquafer at "delta". The effect of aquafer extraction on river flow is "soft science". Nutrient loading of the river is directly altered by irrigators/farmers and its cleanup should be larger at their exposure. Current funding proposals for the dam construction equals to rate pays subsidising dairy farming and horticulture. I suggest, also, that current estimate of \$75.9 million will be blown out to potential double that figure. Therefore I do not support the TDC dam proposal.
