

Coastal management - Responding to climate change

Feedback Form

How might the impacts of future sea level rise, coastal storm inundation and coastal erosion affect what you value about our coastline and living in the Tasman district?

Now that you've read about these issues and looked at the *coastal hazards map viewer* on our website (tasman.govt.nz/link/coastal-management), we'd appreciate your feedback and guidance around what you value most, and what you have personally experienced. This helps us understand what is most important to people and communities, and will help inform options for future coastal management.

We'll be coming back to communities to discuss these options, and how we can best adapt to or mitigate sea level rise, coastal storm inundation and erosion effects.

Feedback closes 13 September 2019.

About you

Name: _____

Company or organisation (if applicable): _____

Telephone number: _____

Email: _____

Age: 0-17 / 18-24 / 25-34 / 35-44 / 45-54 / 55-64 / 65-74 / 75 or older / I'd rather not say

Where do you live? (please choose the closest):

As with any feedback, suggestions, ideas or formal submissions, what you send us becomes a public document. The Council is required to comply with the provisions of the Privacy Act 1993. Personal information is collected, held and used in accordance with the principles set out in this Act.

You only need to fill out those parts of the survey that are relevant to you.

You may wish to attach additional pages, documents or copies of photos to this form.

Sea level rise and coastal storm inundation

1. What do you value that may be affected by sea level rise and coastal storm inundation?

Please select your top five values in order, with your first (1) selection being of highest importance.

- Homes
- Businesses
- Holiday accommodation (e.g. campgrounds, holiday homes)
- Farming and horticultural land
- Lifeline infrastructure (e.g. power, roads, utilities infrastructure)
- Sacred places and sites (e.g. urupā, wāhi tapu)
- Beach access (e.g. footpaths, steps, boat ramps)
- Access to and enjoyment of sandy beaches at high tide
- Coastal parks and reserves (e.g. recreation and picnic areas)
- Mahinga kai/wild food species and the ability to harvest them
- Coastal species and habitats
- Natural character and coastal landscapes
- Appeal of the area as a nice place to live

2. Can you think of other values that may be affected by sea level rise and coastal storm inundation in our district? Please describe these.

- 3. Have you observed or experienced a coastal storm inundation event in our district?
Share your story here. You can also attach documents or photos to this form.**

Coastal erosion

- 4. What do you value that may be affected by coastal erosion?**

Please select your top five values in order, with your first (1) selection being of highest importance.

- Homes
- Businesses
- Holiday accommodation (e.g. campgrounds, holiday homes)
- Farming and horticultural land
- Lifeline infrastructure (e.g. power, roads, utilities infrastructure)
- Sacred places and sites (e.g. urupā, wāhi tapu)
- Beach access (e.g. footpaths, steps, boat ramps)
- Access to and enjoyment of sandy beaches at high tide
- Coastal parks and reserves (e.g. recreation and picnic areas)
- Mahinga kai/wild food species and the ability to harvest them
- Coastal species and habitats
- Natural character and coastal landscapes
- Appeal of the area as a nice place to live

- 5. Can you think of other values that may be affected by coastal erosion in our district?
Please describe these.**

6. Have you observed coastal erosion or accretion in our district? Share your story here. You can also attach documents or photos to this form.

Coastal hazards map viewer

7. Do you have any comments on the coastal hazards information and how it is presented in the map viewer?

Keeping in touch

If you'd like us to keep in touch, please make sure you've entered your contact details on page 1.

- Yes, I would like to receive updates on the Coastal Management Project.
- Yes, I would like to participate in more in-depth discussions with the Council about coastal management.

Please return your survey form
