

## **STAFF REPORT**

**TO:** Golden Bay Community Board  
**FROM:** Community Services Manager  
**REFERENCE:** E855  
**SUBJECT:** **Updates – Report for GB Community Board 13<sup>th</sup> October 2009 Meeting**

---

I have the following updates for the Board's information:

### **GB COMMUNITY BOARD ACTION LIST**

#### **Tukurua Beach Access**

This matter stalled for a few months while issues associated with buildings on a neighbouring property were resolved between the various parties. This has now happened so I have again written to the land owner asking if Council can meet to discuss possible public access through their property to the beach. I am currently awaiting a response to my letter.

#### **Labyrinth Rocks**

I have now received the Engineering Plans for the carpark and these have been approved by our Roading Engineers as well as the Engineers managing the Transfer Station. I hope to meet with Ross McDonald within the next week and certainly prior to the Board meeting so that he can have the work priced as he had done before with the previous plan. We can then authorise the work to be undertaken before the coming holiday season.

#### **Airport Signage**

I have asked our Engineering Department to action this request.

### **OTHER ISSUES**

#### **Collingwood Boat Trailer Park Reclamation**

The consent for this work has now been received and, provided it is not appealed, we will be able to obtain quotations for the work and get on with the job.

#### **Collingwood Museum**

I inspected this building with a Committee Member a couple of months ago and have agreed to have some rotten weatherboards replaced before they deteriorate any further.
