31809	24/06/09	North Street	The heavy rain in June has undermined the work done in this street. The potholes need refilling. Long term solutions are needed for drainage and footpathing. Local residents would like meeting to discuss options. CB is happy to arrange.		Work to be progressed as timeframes allow. Steve communicated with David re this. Steve is happy to meet with residents if required and the meeting is organised by the Community Board.		DO
952	27/08/09	Corner Trewavas Street & Everett Street	The new seal at this corner has not been properly applied and has lifted badly. (Contractor either Fulton Hogan or Concrete & Metals - He thinks FH). This is similar to the problem in Greenwood Street.		Greenwood Street maintenance completed. Trewavas St has been put on hold so they can look at a more permanent and successful way of sealing this		DO
2559	2/11/09	Umukuri Road	road needs maintenance by approaches to Brooklyn School		Will be part of a road reconstruction. In the design process at present		DO
2785	26/11/09	King Edward Street	There needs to be a sign in King Edward Street at the approach to High Street showing the distance and direction of the I-Site		Contractor has been instructed to install a new sign in King Edward Street just before High Street showing people to turn left for the I-site	10/03/10	DO
4362	22/01/10	84 - 88 High Street, Motueka	The concrete footpath in this area is broken and requires replacing. It is a reasonably busy walking area and it's repair is relatively urgent.		Been looked at and put in the list of unbudgeted repairs required		DO
4363	22/01/10	High Street South, Motueka	The footpath between the roundabout and Wildman Road needs improved maintenance. Weed growth both narrows the path and is an issue in the path. Mr Ogilvie suggests that given the residential nature of this street, a two-coat chip seal footpath would be an appropriate solution to the continuing costs of maintenance		sprayed edge of path, now waiting on vegetation to die. Programmed to finish		DO

SR No:	Date Raised	Location	Subject	Status From Dept	Progress	Date Completed	Requested By
36330	8/03/10	Trewavas Street Beach Reserve	There are 3 (or 4) walkways from Trewavas St to the Beach Reserve , they each need to be cleared and cleaned of overhanging shrubs/trees and made tidier for walkers, also the signs need to be uniform (one is blue the others are old yellow/black)		Passed to Sicon for tidying up. Will followup having both signs made standard in blue.		DO
